+ PROFILE

A skilled Software Developer with hands-on experience building cloud-based web systems using modern full-stack technologies. Skilled in developing scalable applications using ReactJS, TailwindCSS, NodeJS, and PostgreSQL, and deploying production systems on Google Cloud Platform. Experienced in cloud-native architecture using Cloud Run, Firebase Hosting, and Cloud SQL. Strong foundation in system design, deployment pipelines, and cross-functional collaboration.

+ PROFESSIONAL EXPERIENCE

Gunma Gohkin Ph. Corporation, Cabuyao City

Jun 2025 - Present

System Developer

- Develop and maintain full-stack, cloud-native web systems using ReactJS and TailwindCSS for frontend and NodeJS with PostgreSQL for backend services. Design, deploy, and operate production applications on Google Cloud Platform, including containerized backend services via Cloud Run, managed databases through Cloud SQL (PostgreSQL), and frontend hosting on Firebase Hosting.
- Build scalable, secure, and integrated enterprise systems by connecting custom web platforms with Kintone and cloud services. Collaborate with cross-functional teams across design, development, and deployment to deliver production-grade systems that improve operational efficiency and support digital transformation initiatives.

Caspo Incorporated, Makati City

Apr 2024 - Sept 2024

QA Engineer & Business Analyst

- Developed and executed structured test plans and test cases, performed regression testing and user acceptance testing (UAT), and gathered and documented business and system requirements to ensure software quality, alignment with business needs, and reliable system delivery.

Atlas Home Products Incorporation, Pasig City

Sept 2023 - Mar 2024

IT Staff

- Provided technical support and system maintenance for company infrastructure, managed system installations, upgrades, and network configurations, and supported cross-departmental technical operations and user training to ensure stable, secure, and efficient business operations.

+ TECHNICAL SKILLS

Web Development

ReactJS, TailwindCSS, JavaScript (ES6+), NodeJS, ExpressJS, REST APIs, PostgreSQL

Tools

Github, Postman, VS CODE, Docker Desktop, Google Cloud Platform

Testing & QA

Test Planning, UAT Testing, Smoke & Sanity Testing

Cloud & DevOps

Google Cloud Platform (Cloud Run, Firebase, Cloud SQL, IAM, VPC, Secret Manager), CI/CD Pipelines (Docker, Cloud Build, Github Actions)
